About the Author ..... *xv*

Chapter 1 Introduction *1*

Chapter 2 Program Fundamentals *3*

Overview *4*
Starting with the Code Template *4*
Case Sensitivity *5*
Writing Code across Multiple Lines *6*
Comments *6*
Declaring Variables *9*
Modifying a Variable's Scope *11*
Declaring Procedures *12*
Passing Arguments to Procedures *13*
Calling Procedures *17*
Example 2-1. Calculate Test Score Functions *19*

Chapter 3 Data Types and Operators *25*

Overview *27*
Simple Data Types *27*
Converting between Data Types *38*
Using Arithmetic Operators *42*
Using Relational Operators *44*
Using Logical Operators *44*
Turning Option Strict On *45*
Example 3-1. Declaring and Using Variables *46*
Example 3-2. Using Enumerators to Print Employee Information *51*
Example 3-3. Comparing Boolean Operators *54*

Chapter 4 Program Flow 61

Overview 62
Testing Conditions with the If Statement 62
Select Case/switch 63
For Loops 66
While Loops 68
Do Loops 69
For Each Loops 70
Example 4-1. Logging In a User and Looping Through a Collection 71

Chapter 5 Exception Handling 79

Overview 79
Using the Exception Class 80
Handling Errors 80
Throwing Exceptions 86
Creating Custom Exception Classes 89
Example 5-1. Copying a File 89

Chapter 6 Classes 99

Overview 99
Declaring Classes and Objects 100
Declaring the Class 101
Using Shared/static Members 102
Initializing the Class with Constructors 104
Shared/static Constructors 106
Declaring Methods 106
Declaring Properties 107
Shadowing Variables 110
Destroying the Class with Finalizers 111
Overloading Class Methods 113
Instantiating Objects 115
Using With Statements 117
Using Structs 117
Example 6-1. Writing to a Log File 119

Chapter 7 Class Interfaces 125

Overview 125
Defining an Interface 126

Implementing an Interface *127*
Implementing Multiple Interfaces *128*
Applying Interfaces *130*
Example 7-1. Managing a Checking Account *132*

Chapter 8 Class Inheritance *139*

Overview *139*
Inheriting a Class *139*
Extending the Base Class with New Methods *141*
Overriding Existing Methods *142*
Inheriting Constructors *144*
Forcing Inheritance *145*
Preventing Inheritance *145*
Example 8-1. Calculating the Price of Items for Sale *145*

Chapter 9 Events *151*

Overview *151*
Declaring an Event *152*
Raising the Event *153*
Handling the Event *154*
Linking the Event to the Event Handler *155*
Example 9-1. Managing a Checking Account *157*

Chapter 10 String Management *165*

Overview *169*
Using the StringBuilder Class *169*
Working with Characters *173*
Using String Functions *175*
Formatting Output *185*
Example 10-1. Manipulating an Input String *186*

Chapter 11 Windows Form Applications *193*

Overview *197*
Default Windows Form Source Code *197*
Using the Visual Studio IDE *198*
Using Common Controls *200*

Chapter 12 File Access 217

Overview 218
Managing Files 218
Reading and Writing Text Files 226
Example 12-1. Managing Files and Directories 230
Example 12-2. Reading and Writing Text Files 237

Chapter 13 ADO.NET 243

Overview 244
Introduction to ADO.NET 245
Opening a Connection 250
Calling Stored Procedures and Using SQL Statements 251
Using a Table for Forward-Only Access 254
Reading and Modifying Individual Records 256
Viewing Data with the DataGrid Control 265
Example 13-1. Viewing and Updating the Northwind Database 267

Chapter 14 Date and Time Functions 277

Overview 278
Storing Date and Time Values 278
Getting the Current Date and Time 278
Inputting Dates 279
Using the TimeSpan Class 283
Example 14-1. Working with Your Birthday 284

Chapter 15 Math and Financial Functions 287

Overview 288
Math Functions 288
Financial Functions 291
Example 15-1. Minimum and Maximum Numbers 292
Example 15-2. Common Financial Functions 294

Chapter 16 Collections 299

Overview 299
Declaring a Collection 300
Adding Elements 301
Accessing and Modifying Elements 302

Examining the Elements *304*
Other Collections in .NET *304*
Example 16-1. Managing a Collection *304*

Chapter 17 Program Interaction *313*

Overview *313*
Working with COM Objects *313*
Early Binding to COM Objects *313*
Late Binding to COM Objects *316*
Working with the System Registry *319*
Example 17-1. Getting a Program's Version Number Using Early Binding *324*
Example 17-2. Getting a Program's Version Number Using Late Binding *325*
Example 17-3. A Generic COM Interface Class *327*
Example 17-4. A RegEditor Class *330*

Chapter 18 The App Object *335*

Overview *336*
Getting Application-Specific Details *336*
Writing to the Event Log *338*
Example 18-1. Displaying Application Information *339*
Example 18-2. Logging Errors Using the Event Log *342*

Chapter 19 Drawing with Forms and Printers *345*

Overview *345*
Efficient Memory Management for Graphics Objects *346*
Drawing on a Form *347*
Printing Documents *349*
Drawing Graphics *352*

Index *359*
